Relief Maps from the Army Map Service

Reference: Memorandum from Assistant Director, OSD, to Assistant Director, OMB, dated 3 May 1950 - Subject: Requesting Procurement of Relief Maps from the Army Map Service

1. In regard to the reference request, a memorandum has been sent to G-2 requesting full information on present and proposed progress for the construction of rubber relief models at the scale of 1:5,000,000 and plastic relief maps at the scale of 1:1,000,000. Details regarding cost and future availability were also requested.

2. The original copies of the 4 rubber relief models now under construction will not be completed for several weeks. The only plastic relief maps now available are 9 quadrangles covering southern Scandinavia. Copies of these relief maps are being requested on a loan basis. It is not believed that this Agency should submit an order for this type of material until the requested information from G-2 is received and a more precise survey of CIA requirements is made on the basis of information included in the answer from G-2.

3. The Naval Photo Interpretation Center has a large number of rubber relief models at many different scales. It also has a construction program under way. The rubber models on file can be obtained on a loan basis. Full information on the model holdings of the Photo Interpretation Center and on its construction program is being requested.
